PROJECTS

Messenger Bot for Better Business Bureau

Facebook Messenger Bot is the back-end application for Better Business Bureau to find appropriate businesses through Facebook Messenger. In this project are used Node JS as back-end, BBB API (to look for find trustworthy businesses in North America), Google Maps API(to identify user location), the huge dictionary of US states/cities and Facebook Messenger Platform.

Quickbooks Helper Web Application

Self-Service customer updater tool. Allows a customer to enter their phone information and verify that they are a customer, and then allows the customer edit their name, address, and email information. This information is then updated into QuickBooks(tm) using the QuickBooks(tm) SDK.
